DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 6 and 16 - 20, drawn to a wheel alignment system and method, classified in class 33, subclass 203.18.
 - II. Claims 7 - 15, drawn to a measuring head and method for measuring wheel alignment using said measuring head, classified in class 33, subclass 702.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as a method for measuring a wheel alignment angle and wheel alignment system that does not requires the use of a thermal sensor and the step of measuring with the thermal sensor a temperature to which the accelerometer is subjected. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Mark Books on March 31, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
